

INTERNSHIP REQUIREMENTS

Potential interns should be students in good standing, and at minimum, should have completed freshman year academic requirements. While students from any academic discipline are welcome to apply for an Internship, we have found that those students having had proven manufacturing experience, engineering design expertise, project management skills, prior employment, and strong communication skills are the most successful and find the experience most rewarding.

In general, internship terms should align with standard academic schedules, with approximate start dates in January, May, and September. While exceptions to this timing can, in some instances, be accommodated, such schedule variances must meet the approval of sponsoring company.

Internships are generally one semester in duration (13-15 weeks, 10-12 weeks for summer). This is the minimum time period to have a meaningful and valuable internship experience.

Minimum Requirements:

Have completed freshman year in any STEM Major with a minimum 3.0 GPA
Posses some basic experience that is relative the company objectives of the internship.

Preferred Requirements:

- Have manufacturing experience
- Are articulate and comfortable with public speaking
- Are detail-oriented and possess project management experience

Applicants are required to submit a cover letter and resume, including three references, via email to edesign@iastate.edu or by mailing to the below address.
